CZECH REPUBLIC

Angelcam

OUR PRODUCTS & SERVICES

With more than 8,000 clients in 140 countries, Angelcam allows users to easily connect any brand of network security camera to the cloud and view them on any device. To get the most from their camera, users then turn to Angelcam's App Store. Popular apps enable cloud storage, broadcasting and time-lapse footage. Driven by community development, Angelcam's App Store is also home to innovative solutions capable of revolutionary advancements in areas of image-based data analytics, sensors, among countless other scenarios. Angelcam's API layer is glue for an ecosystem of developers, manufacturers and partners: insurance companies, security solution providers, data platforms, IoT platforms.

WHAT MAKES US UNIQUE

We are the only security camera cloud-based platform supporting any camera brand, open for 3rd party developers, having open API (IFTTT & IoT ready) and supporting apps powered by computer vision.

www.angelcam.com

WHY SHOULD YOU MEET US

HD security camera prices have dropped 10x in the last six years, there is technology maturity of the cloud & intelligent video and Internet connectivity is 10% faster each year. This is the right time to bring security cameras to the cloud and the world of IoT.

KEY TEAM

Petr Ocasek, CEO - Serial entrepreneur, startup ecosystem builder (co-founder of startupyard.com, node5.com), technology transfer consultant

Robert Prokes, CTO - Built a hosting company with 70K clients and video hosting company with Petr previously, with clients like Skype, Microsoft, Adobe

Adam Herout, Visual computing researcher in the field of computer vision, Professor at Brno University of Technology, Head of Graph@FIT research group in fast computer vision and graphics algorithms

Brad Helicher, VP of Sales - Built from scratch a spin-off of Attunity and sold it for approx. \$10M to Amazon 2 years later

BlindShell

OUR PRODUCTS & SERVICES

BlindShell improves the lives of visually impaired people by providing them with a smart phone that is both easy to learn and easy to use.

WHAT MAKES US UNIQUE

There are 285 million visually impaired users worldwide of which 39 million are blind. We found out that our solution is perfectly accepted by people aged 45+ years, our target group, representing 32 million blind and 186 million visually impaired people of the total above according to WHO statistics.

BlindShell provides visually impaired users with a special mobile phone environment that is intuitive. Designed in cooperation with blind people, our solution is well accepted among this target group.

BlindShell is marketed through a network of business partners and sold through specialist stores that cater for the needs of the visually impaired in every country.

www.blindshell.com

WHY SHOULD YOU MEET US

BlindShell is a unique solution for visually impaired because of its fast learning curve and simplicity. We are building a growing network of business partners in Europe. We are looking for VC investors to support our expansion to US, Brazil and India.

KEY TEAM

Daniel Novak, CEO & Founder - 15+ years experience with assistive technology

Petr Svobodnik, CTO & Founder - Main developer with 4 years of experience with target group

Jan Simik, CRO - 15+ years sales and business development experience

Briskat

OUR PRODUCTS & SERVICES

Briskat is developing a scalable analytical service that lowers entry barriers for instant data insights. Its in-memory, scalable, columnar OLAP database is suitable for cloud environments.

Briskat is used as a core analytic service on which interactive analytic applications can be built. On the front end, our architecture reduces requirements for the user interface enabling developers to build custom, mobile-friendly UIs faster and simpler. On the back end, our product removes the necessity of performance optimization by a human workforce which is complex, expensive, time-consuming and requires a lot of expertise.

We also allow frequent data loads, ease operation complexity, reduce customer unit cost and simplify changes in customer projects.

WHAT MAKES US UNIQUE

Based on our long industry experience in cloud analytics we decided to build analytical database with an

www.briskat.com

architecture that would reflect requirements for cloud usage: many concurrent users, instant query responses and low operational cost, friendly for developers. Our unique combination is many users, instant response time, affordable price and a reasonably large amount of data.

WHY SHOULD YOU MEET US

If you like exploring almost any kind of data and you really hate waiting even seconds when using some web application then we would love to meet you.

Check out our public analytics at <http://house.briskat.com>

KEY TEAM

Vladimir Makovsky, CEO - executive, operations

Hynek Vychodil, CTO - architecture, development

Hlidacky.cz

OUR PRODUCTS & SERVICES

Parents demand quality, trust and convenience when it comes to babysitting. Hlidacky.cz is a web and iPhone app for families in need of local and verified babysitter. Hlidacky.cz allows parents to find long-term and last minute babysitters. It allows babysitters to communicate with parents and have profiles. We are researching new countries to expand this unique app: UK, USA and Poland.

WHAT MAKES US UNIQUE

Our mobile strategy - we have an iPhone app, focusing on last minute babysitting. Our revenue streams include: subscriptions from parents, custom background checks, as well as online and offline courses, in partnership with the Red Cross. Our technology is ahead of the competition, e.g. findababysitter.co.uk. We have a full, not just online, verification process for babysitters.

www.hlidacky.cz

WHY SHOULD YOU MEET US

We are already profitable, making \$5000/month. We need \$400,000 for expansion and verification centers for babysitters.

KEY TEAM

Petr Sigut, CEO & Founder - grew Hlidacky.cz from inception to #1 in the Czech Republic in just 1 year

Vaclav Kuna, CFO & Founder - Serial entrepreneur

David Hrachovy, CTO & Founder - CEO of PrimeHammer.com, clients: SF startups and Fortune 500

CZECH REPUBLIC

SKACE Ltd.

www.getskace.com

OUR PRODUCTS & SERVICES

SKACE mobile apps engage managers in providing employees with instant and frequent performance feedback and training, resulting in motivation for employees to advance professionally, while providing business owners with insightful business & people analytics. Why? Because the majority of employees, especially millennials, are not getting the feedback they are asking for. Cumbersome pen and paper annual performance review forms and current overcomplicated HR solutions are not working - 95% of HR managers agree. The current tools are not providing feedback frequently or effectively enough, leading to employee dissatisfaction, high employee turnover, untrained staff, bad service quality, bad online reviews and consequently to high costs and unfulfilled revenue potential.

WHAT MAKES US UNIQUE

None of our competitors use the swipe-only Y/N questions GUI. Instead of using input fields, scales, etc. our users can convey more information faster and without any bias than by writing sentences. This also makes us uniquely adaptable and scalable across large standardised companies because everyone gets to know how to use SKACE. By interconnecting managers' and employees' apps, the feedback provided over SKACE transforms into coaching insights into the employee's app right away.

WHY SHOULD YOU MEET YOU

SKACE is a leapfrog product with nothing like it in our category and the momentum is ours to take. Microsoft (2014), Deloitte (2015) and now Accenture (2015) with its 330,000 employees are all ditching yearly performance reviews in favour of instant ongoing feedback across their companies. We are finalists of Techstars METRO (Berlin) and Startupbootcamp E-Commerce (Amsterdam).

KEY TEAM

Jan Tlustak, CEO & Co-founder - startup CEO, Co-founder of CheckVenues.com, Hotelgram.com, former MD of Pytloun Hotels Group

Jan Musil, CTO & Co-founder - Full-stack developer, former SW Development Manager at Seznam.cz the "Czech Google"

Miroslav Popelka, Senior Full-Stack Developer & Co-founder - Ness.cz, O2 Revoluce, entrepreneur

Jan Bitter, Senior Full-Stack Developer - Network engineer & Co-founder, Entrepreneur, Founder of a private mobile operator and web-hosting company

HUNGARY

HUNGARY

CoinPay

OUR PRODUCTS & SERVICES

We are building a secure Bitcoin payment system to speed up webshops with our Instant API and cart plugins, enabling vendors to global, accepting Bitcoin and Litecoin payments from all around the world. Our solution is easy to build in and easy to like.

WHAT MAKES US UNIQUE

We provide a top-notch payment system that can serve different vendors' needs:

- Crediting in any currency: No need for Bitcoin? No problem, we credit your account in any currency you like. Immediately
- Crediting to your account: No more waiting days for your money.
- No chargebacks: Say YES to Bitcoin and say GOODBYE to chargebacks.
- Go Global: Accept payments from all around the world!
- Safety: Use the safest payment solution to protect yourself and your customers. Instant API: The integration of our API cannot be easier!
- Support: Online support 24/7...

www.thecoinpay.com

- Fees: Best of all we guarantee extremely low fees: 0%.

WHY SHOULD YOU MEET US

We are looking for strategic partners and investors, who want to take part in our growth. We are changing how people and businesses do finance. We are backed by the CEE region's fastest growing startup studios: Drukka Startup Studio, through which we have access to a team of 23 people, experienced startup builders, and a growing local and international mentor network.

KEY TEAM

András Lőwy, CEO - experienced entrepreneur, built successful companies in the media sector, one of the pioneers of the Hungarian Bitcoin scene

Andor Korodi, CTO - IT professional, 10 years of experience in leading development teams and building IT solutions

Attila Szigeti, Business Development - experienced entrepreneur, alumni of Startup Sauna Accelerator

Jingle

OUR PRODUCTS & SERVICES

The first steps to broaden your social network, Jingle is a unique dating app that helps with match making. We have developed a complex algorithm together with psychologists and big data experts to match the right users indicating how two people can match, based on personality, outlook and mutual interest.

WHAT MAKES US UNIQUE

Jingle is the "Spotify" of dating apps - it is making use of a psychologically tested profiling algorithm, curated quality matches and ideas for dating activities. None of our competitors have such a complex, fully developed dating system.

www.letsjingle.com

KEY TEAM

Balazs Marmarosi, CEO & Founder - 5 years of experience in founding and developing ICT startups, Co-founder of OxoLabs, major Hungarian startup accelerator

Gabor Orosz, CTO - 9 years of experience in senior mobile development expert at Siemens, Microsoft and Liligo

Adam Kovacs, Business Development - Expert in business development with 4 years of experience in mobile sales at Samsung

Tibor Cseh, Head of Design - 4 years of experience in mobile app design

Production.Social

OUR PRODUCTS & SERVICES

A social community-based startup which creates a bridge between the two worlds we live in: the virtual and the real-world.

WHAT MAKES US UNIQUE

Imagine a real-world manufacturing company producing a variety of goods, which however is managed by Internet users. The management platform resides on a virtual community site where users can buy shares of a real-world enterprise. They can participate in the planning and management decisions to the extent allowed by their number of shares. Production.Social is the owner of the company, its assets and its tools, however the business model can vary. These models will be developed based on

the common agreement of the shareholders, who establish strict rules for the given model and a limit for the maximum value of a share that can be purchased. "GardenInTheCloud.com" is the first such business model we have developed. It is based on the idea of a community garden that is managed by virtual shareholders.

WHY SHOULD YOU MEET US

We are looking for investments and we would like to test the idea.

KEY TEAM

Peter Salga

Angela Szecsi

PublishDrive

OUR PRODUCTS & SERVICES

PublishDrive is a one stop solution for ebooks with the most intelligent ebook distribution platform for small publishers and authors. PublishDrive increases ebook sales through delivery to one of the largest networks of ebook stores globally, metadata management and actionable sales analytics.

PublishDrive is one of only 10 companies being featured on Apple's site as a trusted partner.

WHAT MAKES US UNIQUE

PublishDrive is the only strategic partner globally with both Apple and Google serving new e-stores in Africa, Asia and Eastern Europe. Our software is business intelligence driven with cutting edge book review assurance.

WHY SHOULD YOU MEET US

We are a global company having 150+ paying customers in the UK, US, EU and Asia and 10,000 books. We have 7,000

www.publishdrive.com

leads with more than 200 newly qualified customers with an average lifetime value of \$3,000 per customer in our sales pipeline. We already generate \$2,500 MRR and expect to be breakeven by the end of this year.

KEY TEAM

Kinga Jentetics, CEO & Co-Founder - McKinsey Corp. Women Leader, St. Gallen University Alumni, consultant at Zurich Financial Services, Speaker at Frankfurt Book Fair 2015

Róbert Csizmár, CTO & Co-Founder - Business Intelligence specialist with hardcore SQL expertise, SAS developer, Senior IT architect with 8 years experience

Donát Pájer, CMO & Co-Founder - USC Alumni, digital distribution manager for a record label, managed a subscription based, ebook project for kids

HUNGARY

SpringTab

OUR PRODUCTS & SERVICES

SpringTab helps to provide better intelligence and personalization to increase conversion. SpringTab is a social business intelligence tool that helps content providers, such as publishers or online retailers, who use single sign-on, achieve better conversion by revealing social intelligence about their target group to create a personalized user experience.

WHAT MAKES US UNIQUE

What makes SpringTab stand out is that it is hard to create an easy to use scalable solution, which can work across all platforms. From technical side, it was designed around scalability and is easy to integrate. It takes 1-2 days, compared to months with the other solutions. SpringTab revolutionizes the competitive landscape by providing users with personalized content on a mass scale. While similar services do exist, their focus, the level of personalization they provide and their pricing differ significantly. The main business model among the competitors is freemium, and each one of them provides clients with an analytics tool. SpringTab focuses on three service-groups:

1) Data mining and Targeting, 2) Analytics and 3) Personalization. We rely on social data, while most of our competitors do not, which describes the user's personality in the best possible way. While the recommendation engines are anonymous and only track site activity,

www.springtab.com

SpringTab identifies the user and focus on their social psychographic data. We created a SaaS that is as easy to integrate as Google Analytics and is cross-platform, so there is no need to relogin users throughout digital channels, like promotion, website, newsletter. It enables a brand to get to know the customer on a deeper level and develop a real personal relationship with them. Located in Budapest, we intend to follow the lead of successful regional startups, to Prezi or LogMeIn to retain and take advantage of our attractive development costs which we can pass on as savings to the customer.

WHY SHOULD YOU MEET US

Initially we thought that the local Hungarian branch of a Fortune500 would be our target customer, and that by doing a local test project it will validate us and allow us to scale globally. However this turned out not to be correct as regional VPs cannot make decisions about marketing or technology development. We need to go where the real decision makers are and that is why we want you to meet us.

KEY TEAM

Peter Szanto, CEO - digital business development expert

Zsombor Paorczi, CTO - with 5+ years of experience as a lead developer and CTO at various technology companies

POLAND

POLAND

AgileQuant

OUR PRODUCTS & SERVICES

Stock market investors need a tool that will help them monitor and understand current price movements. We show investors what the current financial market situation is in terms of price movements without having to go through all the information that is now available from numerous sources. Trends are the best way to organise information coming from the markets. We have developed a set of tools that let our users focus on the present market moves (with time frames ranging from 1 minute to decades). In the short-term users are informed about all of the sudden market moves that can be caused by unexpected events – such as earnings announcements, policy changes, natural disasters or unanticipated corporate shocks. In all cases these might build up enough momentum to become very profitable trading opportunities. Our technology enables you to detect and understand such movements and trends as fast as possible and allow our users to detect the signs early, e.g. demographic and social changes, technological breakthroughs, shifts in economic power etc. As a result investment opportunities can be spotted.

www.agilequant.com

WHAT MAKES US UNIQUE

Our difference is: Proprietary ontology-based trend detection and clustering algorithm that detects and groups market moves/ trends on related financial instruments in real-time. A marketing strategy that brings traffic to our site with almost no cost - automated tweets about significant price movements on Tweeter and StockTwits.

WHY SHOULD YOU MEET US

Our portal is dynamically gaining more members and visitors each month. We are offering an investment opportunity in our company and we are seeking partners who want join our venture. We also welcome other business development ideas where we can provide value for other companies in the financial investment industry.

KEY TEAM

Michał Sapiński, CEO - extensive experience in data processing, data mining algorithms and software development

Tomasz Wnuk, Chief Commercial Officer - experience in managing IT projects, audits, system design and Java

Alfavox

OUR PRODUCTS & SERVICES

Alfavox offers its own mature unique platforms such as Remote Doctor, Virtual Bank or Insurance branch e-Commerce. Thanks to the above solutions, companies and doctors can handle remotely, via the Internet, a full range of services for their patients and clients. The consultant can fill in and share documents or presentations and doctors can look at the laboratory analyses with the patient. They can send files safely, mark the important details on the screen, complete documents on the screen together with the end user and present them with the real product. Contact can be initiated at any time from any place through devices such as tablets, smart phones, PCs etc.

Alfavox has won many awards in the following areas: innovativeness, high quality product, best product for the banking sector.

WHAT MAKES US UNIQUE

There is no other platform on the market with such complex functionality. One of the significant advantages this product is the possibility to queue the traffic and show personalised advertisements for those who are waiting for a connection. In the situation when many clients are

www.alfavox.pl

trying to contact an institution, each call is prioritised and put into the waiting queue with the most important issues treated in the first instance. Alfavox is intelligent - so the client who calls the single public point can be forwarded to another consultant's number - the traditional method would be that the client has to call other numbers. There is also a calendar option where the client can make remote appointments with the doctor or consultant. Another very important feature is that sessions are recorded including shared screens, documents, video transmission, audio & chat.

WHY SHOULD YOU MEET US

A report by the CBI Ministry of Foreign Affairs shows that there is high unmet need in the market which Alfavox delivers.

KEY TEAM

Janusz Tomiczek, President

Michał Góra, Member of the board & majority shareholder

Piotr Wójcik, Head of R&D, shareholder

Cognitum

OUR PRODUCTS & SERVICES

Cognitum is an innovative, technology company delivering high-end IT services for smart information management, cloud computing and big data processing. We help to build and manage an organisation's knowledge with semantic technology expertise and our award winning ontology modelling tool - Fluent Editor, based on Controlled Natural Language.

Our Ontorion semantic knowledge database allows organisations to easily and rapidly customise software solutions. Semantic descriptions, based on W3C standards, of user interfaces, data models and complex business rules enhance high level application development to maximise productivity and minimise the total cost of design and prototyping. We serve many sectors: industry, health and government and specialise in knowledge databases, decision support systems, intelligence and situation awareness, crisis management and fraud detection.

WHAT MAKES US UNIQUE

Our unique combination of products and functionalities makes Cognitum a leader in semantic technology. Our products offer powerful features that can be adopted in various sectors and can significantly simplify the process of information management in organisations, allowing companies to easily and naturally build complex semantic

www.cognitum.eu

models, scalable server solutions to manage huge ontologies and complex data systems. We also provide text mining components allowing easy integration with free text data sources; and a complete end-to-end toolset without vendor-locking due to standards compliance.

WHY SHOULD YOU MEET US

Our technology has been proven and appreciated by well known customers from government, defence, aerospace, medical and pharmaceutical sectors in many countries: France, Belgium, USA, Brazil. We are building traction and are eager to grow both horizontally and vertically, as there are countless potential applications in nearly any industry. The current Series A round, led by our seed investor, Giza Polish Ventures, is a great opportunity to join a technology-of-tomorrow vendor at an early stage of growth.

KEY TEAM

Pawel Zarzycki, CEO, Cofounder

Pawel Kaplanski, CTO, Cofounder

Alessandro Seganti, PhD, Development Manager

Lukasz Milewski, Business Development, Sales

Katarzyna Kwiecien, Marketing Manager, G&A

Piotr Wójcik, Head of R&D, shareholder

IT-Factory

OUR PRODUCTS & SERVICES

Our solution is a powerful location/navigation engine which combines any accessible technology: GPS, WiFi, Bluetooth 4.0 (iBeacons) and sensors from smartphones through intelligent algorithms, to enable navigation even in the absence of any signals, using smartphones and their sensors.

We also provide dedicated advisory services and a ready to use set of best practices for customers monetising our solutions. One of our solutions - "Navishopi", for shopping centres and shops, is based on Bluetooth 4.0/iBeacon and Wi-Fi location, sophisticated logics and algorithms that change peoples' perceptions.

Shopping tour guides or personal shopping assistants are just some of the features. Using dedicated algorithms, in case of emergency the system provides navigation to exits, even in the absence of Wi-Fi or Bluetooth signals. The system also offers new experiences during store visits, engaging customers and shoppers with live games.

WHAT MAKES US UNIQUE

Our solution creates interactions of people with buildings

and between people in local environments. Our technology changes perception about typical processes and modes of behaviour using smartphones with our apps installed.

WHY SHOULD YOU MEET US

We are a rising star of services based on microlocation and micronavigation creating proprietary knowhow and business value rather than equipment which is easy to replace like beacons.

We focus on bringing real value to our clients, combining different mobile technologies, such as WiFi/Bluetooth, sensor technologies with our algorithms and business models to deliver robust turnkey solutions for security management, insurance, shopping, healthcare, networking and entertainment. For technology partners we offer a dedicated API and assistance with application development.

SLOVAKIA

CropTech

www.croptech.com

OUR PRODUCTS & SERVICES

ResponzIO is a fully autonomous, highly scalable & cloud-connected automation and monitoring kit for small and medium agriculture applications, indoor or outdoor hydroponics and aquaponics projects.

WHAT MAKES US UNIQUE

Our team is our greatest asset with unique combined experience in the scientific and industrial fields. We are utilizing cutting edge technologies in real world applications and applying a blend of expertise from control theory, mechanical engineering and artificial intelligence to create products with significant advantage over our global competitors.

WHY SHOULD YOU MEET US

We are close to finishing the development of the final product. Currently ResponzIO is offered to beta testers in

various locations focusing on the Visegrad 4 countries. Our pre-order campaign is already launched and shipping to customers is scheduled for December 2015. To grow faster we need to penetrate other markets in Europe, Asia and North America. However in addition to the seed round we received in December 2014 we are looking for an additional €500k investment to expand across Europe or ca. \$1M to cover the US market.

Divano

www.getdivano.com

OUR PRODUCTS & SERVICES

Our focus is on home entertainment where we believe that the future is in making the experience responsive, interactive and real. The first step is our mobile app Divano focusing on the second screen trend when mobile is becoming not only an additional but also a significant source of home entertainment. Divano is the only automated platform that is able to leverage traditional media, solve their main problem right now and create a path for future innovation.

WHAT MAKES US UNIQUE

1. Incremental revenues to our partners
2. Built on existing viewer behavior
3. Patent pending solution
4. Gamification makes all that fun

WHY SHOULD YOU MEET US

Our team has built great technology for broadcasters to make new money

- SaaS administration tool for content producers/broadcasters

- In-house built audio recognition algorithm able to sync TV channel with Divano feed
- analytics: targeting, predictions and media exposure reports
- API for television graphics to display results of voting, charts, comments and more
- Our team comprises passionate, energetic and talented software developers

KEY TEAM

Lujza Bubanová, Strategy/Business & Co-founder

Boris Sebosik, Tech/UX & Co-founder

EMOMIME

OUR PRODUCTS & SERVICES

Our goal is to replace static, old-fashioned mannequins in shop windows with an intelligent avatar which analyses people passing-by: emotions, gender, age and clothes - attracts their attention and calls them inside, using incrementally improving A.I.

The store is the most effective area to engage consumers. It has been proven that almost 80% of purchasing decisions are made just at the point of purchase. However, what are retail shops doing in order to get potential customers inside the store? Old-fashioned static mannequins in shop windows have worked for ages but the future is called Emomime! Emomime is a digital human that lives in show-windows. It lures people inside the shop using advanced cloud-based artificial intelligence. Just "plug&play" and Emomime changes a boring shop window into emotional experiences that convert passers-by into customers!

WHAT MAKES US UNIQUE

The product is based on advanced A.I. algorithms together with a package software solution that does not have any competing business. Emomime not only identifies people passing-by, its algorithms recognise emotions, gender, age and colours of peoples' clothes and adapt Emomime's behaviour according to it.

Emomime has a growing set of interactive behaviors that convert shop windows into an emotional experience that

www.emomime.com

is funny, interesting, exciting, lovely, captivating. The cloud-based implementation gives Emomime a capability to learn how to behave more and more efficiently so that people love Emomime and the shop he represents. Emomime needs just one Kinect sensor or a low cost (<€150) camera with a computer, any kind of display and internet connectivity and it is ready to work.

WHY SHOULD YOU MEET US

We are a team from a laboratory of artificial intelligence and cybernetics that wants to transfer knowledge from academia to commerce. Despite the fact that we have been working on this project for only 6 months we have had a number of successes: 2nd place on Startup Weekend, Winners of Business Idea grant by a Slovak bank, finalists of the University World Cup, presentation for the president of the Slovak Republic and many appearances in national media.

KEY TEAM

Maria Vircikova, Founder - a young innovator of Forbes 30 under 30 in Slovakia, with a PhD. in Artificial Intelligence

Martin Certicky, Back-end developer

Gergely Magyar, Back-end developer

sli.do

OUR PRODUCTS & SERVICES

Sli.do is a communication platform and live slide sharing for meetings and events that makes audience interaction easy.

We enable a host of innovative features: Crowdsource the best questions from your audience and let anyone in the audience ask questions or vote up the best ones; easily ask your audience their opinion and display the results live; Let attendees follow the slides on any device and capture the best ideas with one click

WHAT MAKES US UNIQUE

sli.do is known in the industry for its innovativeness, simplicity and exceptional customer support, with prestigious clients such as Google, SXSWedu, LeWeb, Oracle, Siemens and hundreds of others.

www.sli.do/home

WHY SHOULD YOU MEET US

In the past 2 years we have supported over 4000 events across more than 70 countries, helping to change the way meetings are run around the world.

KEY TEAM

We are now a team of 20 people, gradually building bases in London, San Francisco, NYC and Kuala Lumpur

SLOVAKIA

youstice

www.youstice.com/en

OUR PRODUCTS & SERVICES

Youstice is a smart web application and customer service tool that helps companies resolve complaints and customers to be assisted with their issues. With Youstice, companies can directly communicate, negotiate and handle complaints in 11 languages, 24/7. We have sector-specific solutions for gambling/gaming, travel, car rental and e-commerce industries, with more to come. Youstice has been available globally to businesses and service providers since summer 2014.

WHAT MAKES US UNIQUE

We are the only application on the market that allows advanced, automated responses to customer complaints in 11 languages, with predefined answers, types of issues and answers. Thanks to Youstice, companies can limit the number of negative reviews, optimize internal processes in their customer centres and save time and money otherwise spent resolving customer issues. Additionally, Youstice is fully compliant with the EU Act on Consumer Disputes, as it allows customers to escalate unresolved issues for a third-party decision of ODRs (online dispute resolution).

WHY SHOULD YOU MEET US

We are looking to share experiences, gain insights and advice and discuss potential cooperation opportunities

Our innovative solution can help every company or service provider who would like to make the extra step and improve their current customer service, and help their customers interact better with their business, resolve complaints in a matter of minutes and improve the workflow of their customer centres.
