Rooted in constructivist theory, her structurally-based objects project a unique spirituality by nature of their investment with “sacred geometry.” She received numerous awards including the **2014 Czech Grand Design Award for Best Jewellery Collection**.

ZORYA

Established in 2011, the ZORYA studio was foreshadowed by a long-time collaboration between **Zdeněk Vacek** and **Daniel Pošta** which gradually resulted in the crucial subject of their jewellery – time as a positive factor and a creative process. They use precious metals, surgical steel, flaxen ropes, diamonds, pearls and cultivated crystals. Playing with new combinations and materials is firmly based on the perfect knowledge of traditional goldsmithing.

The ZORYA studio received the most prestigious design award in the country, the **Czech Grand Design – Designer of the Year** in 2012, and has presented its works at numerous international exhibitions and fairs: Premiere Classe Paris, Inhorgenta Munich, SOFA NY, SOFA Chicago, Milano Design Week and others. Its expanding sales network includes Los Angeles, New York, Chicago, the Maldives, Konstanz and Wien.

Markéta Kratochvílová

Winner of two Czech Grand Design Awards – Jewellery Designer of the Year 2016 and Talent of the Year 2014, Markéta Kratochvílová draws from a wide range of references, including the history of fashion, an anthropological interest in jewellery and manner of dress of indigenous groups in India, Africa, and Asia. Her mostly wearable pieces— half jewellery, half clothing, always laden with layers of meaning— explore the sculptural possibilities of different materials while making a statements about the complexities of femininity.

Kratochvílová considers the relationship of body and jewellery an important partnership that presents the personality of the wearer as well as affects it. This artist is interested in the dark recesses of the primordial, the ambivalence of natural and artificial forms, the story of the hidden intimate self in contrast with provocatively expressive ornament. Her more recent work returns to a clear, modernist expression and creates a system of elements that are already characteristic of her work.
